Some of the trades look like it some don't.<legacyquote><LINEBREAK><LINEBREAK><<< </legacyquote></quote>Just coming back to you here. We don't believe the accounts arbing. The accounts a scalper, largely focusing on the US open where volatility is rife. The outperformance arose from a sub period nearing the start of the account but PL subsequently deteriorated since. Reviewing your risk profile, you could consider making a piecemeal adjustment in the max time of the open / close delay to a further 200ms on the Volume Exception >=30	ISRA/Traders Global Group

2/7/2022	2:18:49	Joshua Dentrinos	ISRA/Traders Global Group	however if he isnt hitting old prices makes sense. I don't see how another 200 ms makes trading &quot;fair&quot; to be honest.	ISRA/Traders Global Group
2/7/2022	2:41:09	Antony Tan	ISRA/Traders Global Group	Hi Josh, since you're filling everything at TOB as opposed to depth, you're already providing an advantageous trading environment, particularly for more sizable orders. <LINEBREAK><LINEBREAK>Applying a slightly larger delay would even the playing ground a little. The adjustment would be considered piecemeal, as the min would still be at 100ms. So the delay would randomize between 100ms - 200ms. Thus harder to notice.	ISRA/Traders Global Group
2/7/2022	2:41:32	Joshua Dentrinos	ISRA/Traders Global Group	if you can add it lets check it out	ISRA/Traders Global Group
2/7/2022	2:41:43	Joshua Dentrinos	ISRA/Traders Global Group	see whether we get feedback from it	ISRA/Traders Global Group
2/7/2022	2:47:09	Antony Tan	ISRA/Traders Global Group	Great! Let's give a crack. If feedback is negative we can always revert. <LINEBREAK><LINEBREAK>Do you mind emailing <LINEBREAK><LINEBREAK><a href="mailto:tradingteam@isriskanalytics.com">tradingteam@isriskanalytics.com</a><LINEBREAK><LINEBREAK>&quot;On Trader Global Live default risk profile. Any idea why this happens (they are not using VPN) <legacyquote><LINEBREAK><LINEBREAK><<< </legacyquote></quote>Hey Josh,<LINEBREAK>There's a number of possible reasons but load on the underlying VM is certainly a concern here (that it could be causing general delays and therefore causing some clients to route through other DC's). <LINEBREAK>I have a meeting with the Infrastructure/IT guys today so I'll see where they stand at getting the new VM's setup at which point we can configure them all on your MT4 and MT5 servers	ISRA/Traders Global Group
2/7/2022	13:12:48	Joshua Dentrinos	ISRA/Traders Global Group	ok great. Do you know if we can prioritize DC's on mobile?	ISRA/Traders Global Group
2/7/2022	13:12:51	Ben Johnson	ISRA/Traders Global Group	I think the best approach here is to wait till those new servers/DC's are setup and see if you have any further issues as we could very likely just be seeing the results of the overloading of the current VM's	ISRA/Traders Global Group
2/7/2022	13:13:08	Joshua Dentrinos	ISRA/Traders Global Group	because it seems like on mobile users can't choose their DC's	ISRA/Traders Global Group
2/7/2022	13:13:58	Ben Johnson	ISRA/Traders Global Group	Sorry, I don't think you can through mobile in MT4	ISRA/Traders Global Group
2/7/2022	13:15:06	Joshua Dentrinos	ISRA/Traders Global Group	well, I'll hold my hands together and pray that we dont get a flood of these issues as its resulting in negative reviews on trustpilot and such	ISRA/Traders Global Group
2/7/2022	13:15:37	Joshua Dentrinos	ISRA/Traders Global Group	we might have to remove the AU dc	ISRA/Traders Global Group
2/7/2022	13:16:00	Ben Johnson	ISRA/Traders Global Group	Yea, sorry, I let the team know that getting the new VM's setup needs to be their top priority	ISRA/Traders Global Group
